Power Columns

Power Column

## Maximum access, maximum flexibility

### At a glance

- Four-sided access to the patient
- Efficient use of premium space
- Two-sided accessory tracks on all four corners of the column
- Numerous accessories available
- Two sizes of power columns (23" and 15") for maximum flexibility

WittRock power columns offer the best of both worlds: 360° access to critically ill patients, and the best use of space in the crowded acute care environment.

WittRock power columns allow caregivers to move freely around the bed, including the critical area around the head of the patient. Free of the wall, the bed can be pivoted around to allow the patient to see out the window or watch television, without disturbing vital services.

**Built and configured just for you**

Each power column is designed and built to individual specifications. The unique accessory track system provides full-length, two-sided tracks on all four corners, allowing staff to position equipment where it's needed most.

Both power columns offer full service capacity, making it easy for staff to focus on patient care.

**Technical Specifications**

**Column cross-section**

Feature	Dimension
Power Column.....	23.125" W x 7" D
Small Power Column .....	15.125" W x 7" D

**Floor Space (Base)**
