

Smart, durable, easy to install, simple to clean and accommodates all beds

At a glance

- Positions bed and protects wall
- Delivers data and electric to the bedside
- Aesthetically pleasing, fluid, “shoulderless” design
- Accommodates bariatric beds
- Seamless, easy to clean
- Simple to install; single piece cover
- Optional laminate insert

As anyone in the healthcare business knows, construction dollars are hard to come by. The WittRock Bed Locator maximizes your investment by protecting the precious real estate behind the bed. Patients and beds are getting bigger and heavier which leads to even more damage to unprotected walls and structures. The WittRock Bed Locator was specifically designed to meet these new challenges.

The WittRock Bed Locator’s shoulderless design accommodates the trend toward increasingly wider, bariatric beds and still delivers data and electric to the head of the bed where you need it. With sides angled at 45 degrees, the WittRock Bed Locator helps prevent damage to cords and connections during high-low positioning of the bed. The durable, two-piece design is simple for contractors to install and the outer shell is seamless so the WittRock Bed Locator is easy to clean.

WittRock Healthcare.

Bed Locator

Did we mention the WittRock Bed Locator is smart? When integrated with the WittRock Patient Light, it will automatically shut off power to the bed in the event an IV pole comes in contact with the light, reducing the risk of property damage and protecting you and your patients.

Smart, durable, easy to clean and inclusive of bariatric beds – the WittRock Bed locator is the natural choice for your patient environment.
