Headwall Systems

WittRock®

The Integris® C Series Headwall Systems

The Integris® C Series Headwall Systems are patient care in action. These highly functional headwall systems adapt to various patient environments. With appealing lines, the attractive headwall systems help create a pleasant atmosphere in patient rooms and, as the acuity level of patients under care changes, the characteristics of the Integris® C Series Headwall Systems respond.

The streamlined Integris® C Series Headwall Systems are designed to integrate with beds, stretchers, communication systems and other WittRock® equipment. Available in a wide array of High Pressure Laminate (HPL) surfaces to complement room design

and color scheme; its sculpted appearance not only softens the room, but minimizes dust collection and facilitates cleaning.

As with all patient-care environment products at WittRock, our specialists are there to carefully analyze the clinical needs and the unique culture of your unit. Let our team of skilled professionals in architecture, patient beds and surfaces, maternal-infant care, communications, health care furnishings, medical gases and finance help unfold the possibilities. The result ... facilities and equipment that blend leading-edge technology within an environment of care.

The Ultimate Headwall System for High Acuity Areas.

The Integris® 2002C Headwall System

- 1 Moveable Gas Outlets allow optimal positioning and serviceability
- 2 Standard 14-Port Manifold located behind gas panel (maximum of 4-Oxygen Outlets, 4-Medical Air Outlets and 6-Vacuum Outlets)
- 3 Optional integrated Bed Locator protects walls and equipment
- 4 Seamless horizontal equipment rail
- 5 Nurse Call and other low voltage previsions
- 6 Standard accessory bar provides second level of equipment management

The Integris® 2002C Headwall System organizes medical services conveniently within reach of caregivers. Its exclusive moveable gas outlets allow caregivers to quickly configure the headwall system to address patient needs and staff preference. And, the availability of multiple rails allows for versatile positioning of electrical receptacles, low voltage devices and accessories.

The Integris® C Series Headwall Systems are simpler to install than in-wall services, and the chased units can be mounted on existing walls in any care area to minimize renovation time and construction costs. Additional gas outlets may also be installed on the Integris® 2002C Headwall System after initial installation.

Economy, Flexibility, Dependability and Productivity.

The Integris® 2001C Headwall System

- 1 Fixed Gas Outlets can be located along the rail
- 2 Seamless horizontal equipment rail
- 3 Optional Accessory Bar provides second level of equipment management
- 4 Shown as a private unit. Also available with or without a chase and in semi-private configurations

A more affordable solution that still offers many of the features of the Integris® 2002C is the Integris® 2001C Headwall System. For acuity areas that require centralization

and organization of services, this system can still be customized to meet immediate and future care needs.

Technical Specifications

Integris® 2001C

Overall	
Feature	Dimension
Length (1 rail)	6' 6" - 9' 6" (78 - 289.6 cm)
Rail Height.....	14.767" (37.5 cm)
Rail Depth	4.4" (11.2 cm)
Device Centerline from Floor.....	44.75" (108.6 cm)

Vertical Chase	
Feature	Dimension
Width	13.25" (33.7 cm)
Depth	5.5" (14 cm)
Height	varies with ceiling height

Integris® 2002C

Overall	
Feature	Dimension
Length (1 rail)	6' 6" - 9' 6" (78 - 289.6 cm)
Rail Height.....	24.688" (62.7 cm)
Rail Depth	4.4" (11.2 cm)
Device Centerline from Floor.....	44.75" (108.6 cm)

Vertical Chase	
Feature	Dimension
Width	13.25" (33.7 cm)
Depth	5.5" (14 cm)
Height	varies with ceiling height

Integris® 2003B

Overall	
Feature	Dimension
Length (1 rail)	6' 6" - 9' 6" (78 - 289.6 cm)
Rail Height.....	9.451" (24 cm)
Rail Depth	10.75" (27.3 cm)
Device Centerline from Floor.....	69.5" (176.5 cm)

Vertical Chase	
Feature	Dimension
Width	13.25" (33.7 cm)
Depth	5.5" (14 cm)
Height	varies with ceiling height

If requesting an Integrated Bed locator with isolated power, the "C" version is not available. It will be a "B" version. The Device Centerline from Floor for the "B" version is 42.75".
