Overbed Light (P005191)

TECHNICAL DATA SHEET

Purpose
The Overbed Light (P005191) supplies the patient with an ambient room light, a light to read by, and task illumination for the caregivers.

Standards
As manufactured, the Overbed Light is compliant with the codes and standards as listed below.

For USA installations:
- National Fire Protection Association®
  NFPA 99: Standard For Health Care Facilities
- NFPA 70: National Electrical Code® (NEC®)
- ANSI/UL-1598: Luminaires

For Canadian installations:
- Canadian Standards Association (CSA®) Parts - 1 and 2 of the Canadian Electrical Code (CSA 22.1 and CSA C22.2) and CSA C22.2 No. 250.0: Luminaires

General Description and Responsibilities
- The Overbed Light is a one-piece fixture with three or four lamps for task illumination, one or two lamps for ambient illumination, and one lamp to read by. A wall switch controls the lights.
- This WittRock ceiling light is eULus-listed (IEVV for USA installations and IEVV7 for Canadian installations) under UL-Ffile No: E318785.
- The Overbed Light is a prefabricated and factory wired fluorescent light fixture that is mounted and recessed into the ceiling structure of a general care area. The light must be installed and positioned a minimum of 90” (229 cm) above the finished floor.
- This ceiling light provides a hinged ingress barrier cover over the face of the light fixture, providing for UL-Classified IP65 enclosure compliance (for damp, dusty, and wet locations) in accordance with IEC 60529: Degrees of Protection (IP Code), and IEC 60598: Luminaires.
- The installation contractor is to install the light fixture and connect facility service wiring in accordance with Hill-Rom’s Overbed Light (P005190) and (P005191) to Wall Box—Installation Instructions (151219), and all national, local, and state or provincial building codes, and electrical codes.
- The lamps are not supplied with the light fixture.

Light Accessories
- Night Light—A LED Night Light is available as an optional accessory for the Overbed Light. The Night Light is available in 5, 7, or 9 watt configurations.
- Chart Light—A 20 watt, 12 V AC Chart Light is available as an optional accessory for the Overbed Light.

Manufacturer Qualifications
- Shipment is the responsibility of WittRock.
- The Overbed Light is shipped in a corrugated carton and is skid-wrapped.
- The Overbed Light configuration options are established at the time the order is accepted.

Design Requirements
- The fixture is encased in 20-gauge CRS, one-piece seam welded construction.
- The flange and grid are 20-gauge CRS, standard four-piece construction that is spot-welded to the encasement.
- The corners are mitered and spot-welded.
- The encasement is finished in a white urethane TGIC polyester and is processed through a 5-step pre-treated procedure.
- The light has an antimicrobial finish.
- The task compartment is covered by a white plastic 0.5” (12.7 mm) x 0.5” (12.7 mm) slide louver.

2. CSA® is a registered trademark of Canadian Standards Association, Inc.
Overbed Light (P005191)

TECHNICAL DATA SHEET

- A vented pearlescent acrylic steel diffuser covers the ambient compartment lamps.

Lamp Requirements
- The Overbed Light requires seven type F55TT (BIAX) (55 watt rapid start) lamps for a fully featured light. Less bulbs may be required. This depends on the options ordered.
- The Overbed Light Chart Light option requires a MR16 lamp.
- The lamps are not supplied with the light.
- The lamp requirements do not include the night light.

Performance Requirements
The values listed in this section are in footcandles, as measured on the bed surface with the light fixture mounted in a 102" (259 cm) ceiling.

- **READ LIGHT ONLY**
  47" (119 cm) above finished floor (AFF) @ 45°
  Foot: 0 Seat: 0 Head: 27
- **READ PLUS AMBIENT AND TASK LIGHTS**
  30" (76 cm) AFF
  Foot: 117 Seat: 135 Head: 114
- **TASK LIGHT ONLY**
  30" (76 cm) AFF
  Foot: 75 Seat: 84 Head: 66
- **AMBIENT LIGHT ONLY**
  30" (76 cm) AFF
  Foot: 21 Seat: 34 Head: 35

Components for each Light
- One Model P005191 Overbed Light

Electrical System
- 18 AWG wire is the minimum wire dimension used in the Overbed Light circuitry.
- The ballast is Class P, rapid start, sound rated A, high power factor in the specified voltage. All ballast are 47CFR-18 compliant.

Installation and Maintenance
- The Overbed Light is designed to be mounted in T-grid ceiling tracks.
- All hardware and wire required to mount the light is supplied by the contractor.
- The light must be installed and positioned a minimum of 90" (229 cm) AFF and in accordance with the Hill-Rom’s Overbed Light (P005190) and (P005191) to Wall Box—Installation Instructions (151219), and all national, local, and state or provincial building codes, and electrical codes.
- Supply connections are to be made to one circuit.

Service
A list of service parts for the Overbed Light is available in Hill-Rom’s Recessed Mounted Luminaires Service Manual (154190).

Submittals
- The light will not be assembled until all approvals are received.
- WittRock will supply physical samples only if specifically asked, and the cost to do so is negotiated.

Warranty
WittRock warrants all materials and workmanship to be of the quality, quantity, and character specified or shown. Defects because of the use of incorrect workmanship or material, found or made known to WittRock within one (1) year of delivery, will be made good by WittRock at no added expense to the owner.

Order Data
Order part number P005191 for the Overbed Light.

Electric Power Connection Options

The electric power connection wiring diagram options for the Overbed Light are as follows:

- Option 1—120 or 277 V AC, wall switches control the ambient, reading, task (one switch controls all four lamps), and the optional chart light (see figure 1 on page 4)
- Option 2—120 or 277 V AC, wall switches control the ambient, reading, task (two switches control the four lamps), and the optional chart light (see figure 2 on page 5)
- Option 3—120 or 277 V AC, wall switches control the task (one switch for all four lamps), and the optional chart light, and a low-voltage controller with siderail and pillow speaker switches control the ambient and reading lights (see figure 3 on page 6)
- Option 4—120 or 277 V AC, wall switches control the ambient, reading, task (two switches for the four lamps), and the optional chart light, and a low-voltage controller with siderail and pillow speaker switches control the ambient and reading lights (see figure 4 on page 7)
